

# 2010 Approved Emergency Road Projects

## (As of 7/02/2010)

The Governor announced on April 9, 2010 that up to \$10 million is available in state disaster funds for emergency road work in five northeast South Dakota counties. These funds have been made available to the counties and townships to minimally restore traffic to the main backbone of the emergency services road network through affected areas for which there are no viable alternate routes. Facilitated meetings with emergency managers, local law enforcement, and other county officials were held in each of the counties to:

- Identify the routes that are considered the backbone of the emergency services network.
- Identify locations on the identified routes that are not passable and for which there is not a viable alternate route.
- Prioritize the identified locations that are not passable based on such factors as; the number of people affected, feasibility of restoring traffic, potential for FEMA reimbursement, etc.

Below is a list of project sites that have been identified and approved for construction. If you feel that a site may have been inadvertently missed and should be considered for this program, please contact your local County Officials.

The projects listed as complete are either complete or expected to be complete by 7/02/10. These completed projects are intended to only provide roadway stabilization to allow emergency vehicle traffic access – the projects will not restore the roadway to its expected permanent condition.

	<u>Under Contract</u>	<u>Complete</u>
