

SECTION 891 DUST CONTROL CHLORIDES

891.1 Requirements

Dust Control Chlorides: Dust control chlorides shall conform to the following specification requirements:

A Certificate of Compliance shall accompany each delivery of calcium chloride or magnesium chloride. The certificate shall contain the following information:

- 1) The gallons (Liters or cubic meters) of solution.
- 2) The weight of the solution.
- 3) The percent concentration by weight of anhydrous calcium chloride or anhydrous magnesium chloride.
- 4) The specific gravity and temperature of the solution at the time of loading.

Each delivery of material to be used will be sampled by the Department, and submitted for a chemical analysis to the Central Testing Laboratory.
